

<i>Element</i>	<i>SSD</i>	<i>SPL</i>
<b>Selection of Subjects</b>	<b>18 practitioners.</b>	
	N(SSD)=18	N(SPL)=18
<i>Time to Market</i>		
<b>Mean</b>	113.33	4.5
<b>Shapiro-Wilk Normality Test</b>	p = 0.0274 (0.0274 < 0.05) Non-normal.	p = 0.0014 (0.0014 < 0.05) Non-normal.
<b>Statistical Test</b>	Mann-Whitney-Wilcoxon (326.5 > 0) Evidence of statistical differences among the time.	
<b>Result</b>	SPL has a better time to market.	
<i>Quality (Number of Faults)</i>		
<b>Mean</b>	7.11	1
<b>Shapiro-Wilk Normality Test</b>	p = 0.0006 (0.0006 < 0.05)	p = 0.00000007 (0.00000007 < 0.05)
<b>Statistical Test</b>	Mann-Whitney-Wilcoxon (282 > 42) Evidence of statistical differences among the number of faults.	
<b>Result</b>	SPL has a minor number of faults in the products.
